EXPERIENCE

Docker, Inc.

Palo Alto, CA

Senior Sales Operations Analyst

Aug 2025 - Present

- Business Partner to VPs of Sales & CRO for executive forecast meetings, driving data consistency through weekly pipeline audits, stage progression tracking, and forecast reconciliation.
- Built a data-driven territory carving framework using product usage and adoption signals via Snowflake/SQL, and deployed Salesforce Enterprise Territory Management with Account and Opportunity Teams for dynamic assignments and pipeline visibility
- Implemented Salesforce Cases centralizing Deal Desk and Sales Ops requests with approval automation and routing, solely supporting 30+ daily tickets from a 110-person global revenue team with a sub-18-hour SLA.
- Built an internal GTM AI agent on Claude that ingests the GTM SOP library from Google Drive, enabling reps to query process docs in plain language, with prompt-level guardrails scoped to enforce approved answers only
- Principal enablement lead on sales all hands and new hire onboarding, representing a 28-person RevOps team

Sales Operations Analyst

June 2024 - Aug 2025

- Built Docker's first automated lead routing system, reducing inbound time-to-contact from 10 days to under 1 day.
- Admin of GTM tech stack, architecting CRM integrations, field mappings and governance across revenue systems.
- Built end-to-end BDR prospecting and campaign-to-sequence workflows combining PQLs, web traffic, Common Room intent signals, product usage data, and GitHub activity, routing into automated Outreach sequences across all campaign types

Deal Operations Associate

May 2023 - June 2024

- Shipped Docker's first AI workflow for revenue teams, building an AI-powered contract language generation system and leading GTM enablement for AI adoption across the sales org.
- Owned deal desk operations for 80% of closed deals (\$200M ARR), validating POs, contract terms, and AWS/Azure Marketplace bookings.
- Served as CRM ARR reporting and revenue recognition SME for the Director of Finance and CFO, building automated audit workflows supporting monthly close and board-level financial reporting.

LeClaw.io — Open Source GTM Automation Agents

Founder & Builder

March 2026 - Present

- Built a deployable RevOps agent team that automates pipeline inspection, BDR accountability audits, data quality checks, and deal review across HubSpot and Salesforce via OAuth.
- Built Le Directeur, an orchestrator that takes natural language RevOps questions, routes to the right agents, runs in parallel, and synthesizes answers with stored context
- Architected cascading model routing (Haiku per agent, Sonnet for synthesis) to minimize token cost, with each agent containerized in Docker with resource limits
- Shipped a multi-tenant SaaS dashboard at app.leclaw.io built on Next.js and Supabase with Vercel Cron scheduling and Slack delivery for async agent outputs
- Open-sourced the framework (@leclaw/core on npm) with GitHub Actions CI

NextGen Federal Systems

Morgantown, WV

Software Development Intern

Aug 2022– May 2023

- Built ETL pipelines in Python, SQL, and PySpark to consolidate sales and product usage data, and developed a renewal likelihood scoring model in Spark MLlib to prioritize sales outreach

Palo Alto Networks

Santa Clara, CA

Business Development Representative Intern

May 2022 - Aug 2022

- Prospected and qualified leads as a BDR, contributing over \$260K in sourced opportunities while partnering with AEs and Marketing to standardize outbound messaging and plays adopted by the broader BDR team.

SKILLS

Technical: Python (Pandas, PySpark), R, SQL, TypeScript, Node.js, Git, Docker, GitHub Actions, Supabase, Vercel, REST APIs, Webhooks, Tableau, PowerBI, Looker, Sigma, Claude Code, Cursor

Tech Stack: SFDC, Zapier, Common Room, Tackle, Lusha, Outreach, LeadIQ, ZoomInfo, Sales Navigator, HubSpot, CPQ, Clari, RingLead, Jira, Gong, n8n

EDUCATION

West Virginia University | Bachelor of Science in Business Administration

Relevant Coursework: Business Data Mining and Visualization, Database Management Systems, Computer Science
